MULTIPLAST PLASTIC SHEETINGS vs PLASTIC SHEETINGS IN THE U.S

A Sustainable and Practical Alternative to Traditional Plastic Sheeting

Why is our plastic sheeting milky white instead of transparent like in the U.S. ?

> Made from 100% recycled plastic, unlike traditional sheeting made from virgin plastic. This explains the milky white appearance – a visible sign of our eco-conscious production.

Key Advantages:

Eco-Friendly

Manufactured entirely from recycled materials with sustainability goals

Improved Visibility

The milky color allows you to see the protected area clearly on the floor – unlike crystal-clear sheeting that can be hard to notice.

User-Friendly

- Non-sticky: Easy to unfold and position
- Non-slip: Safe to walk on – it won't slide or shift

A smart solution combining safety, practicality, and eco-responsibility

ABOUT

PRODUCT USES – “Bobineau”

Medium & Heavy-Duty Specification and Uses

MAXIMUM TEAR & PUNCTURE RESISTANCE

Ensures total durability during use. Perfectly suited for indoor & outdoor protection, word sand and heavily soiled construction sites.

EASY TO USE

Simple and quick to install, it rolls out in a single gesture, it's easy to set up and transport. Easy and precise cutting

LARGE SIZE

Measuring 10 x 100 ft, it provides 1000 sq. ft of total coverage to protect floors and large surfaces in a handy format

PROFESSIONAL QUALITY

6 mils = thickness for safer and easier work

RECOMMENDED USES
MEDIUM-DUTY PRODUCTS

Sanding

Painting

Wallpaper Installation

Chimney Sweeping

Construction Site Use

Equipment Cover

RECOMMENDED USES
HEAVY-DUTY PRODUCTS

CONTRACTORS
For professional and individual use

HEAVY DUTY
Ideal for demanding tasks and rugged conditions

CONSTRUCTION SITE USE
Perfect for protecting surfaces on construction sites

EQUIPMENT COVER
Suitable for covering machinery and equipment

ABOUT

OUR PRODUCT DULYFIX

**SELF-ADHESIVE NON-SLIP WATERPROOF & REUSABLE
